

**We make an enzyme and odor remover from an all natural formula. We use 'Certified Organic' fragrances. The product is neither a food nor a drug. What criteria must we meet in order to label the product 'Product contains organic ingredients?'**

If you are not obtaining certification, not representing your product as "USDA organic," not using the USDA seal, not making any reference to the NOP regulations, you may list your organic ingredients on your product and truthfully label the product. Further certification is not required by the NOP.
